Rizviz ERP — Administrator Manual

Prepared by: Rizviz International Impex

Version 1.0 | June 2026

Confidential — Internal Use Only

© 2026 Rizviz. All rights reserved.

1. Introduction to Rizviz ERP

Rizviz ERP is a comprehensive Enterprise Resource Planning system developed exclusively for **Rizviz International Impex**. It is designed to unify and streamline all core business processes across multiple companies and branches into a single, integrated platform.

This **Administrator Manual** is intended for users with the **Admin** role who manage the full Rizviz ERP environment — including HR, payroll, assets, projects, recruitment, interviews, leads, reports, and security audit.

Key Features

- Multi-Company / Multi-Branch architecture
- Role-based access control for secure, permission-driven usage
- Centralized employee and HR management with live UAT database
- Real-time payroll and salary processing with payslip generation
- Asset inventory tracking — register, assign, and return
- Project resource management and team allocations
- Interview data synced from Interview Software.xlsx with change tracking
- Leads pipeline derived from interviews or added manually
- Corporate Reports Center — PDF and Excel export
- Security Audit Registry — login and payroll action logging

System Requirements

Requirement	Details
Browser	Google Chrome recommended (version 90+)
Frontend URL	Local: `http://localhost:3000` Production (Vercel): `https://rizviz-interviews-portal.vercel.app`
Backend API	Local: `http://localhost:5000` Production (Railway): `https://rizviz-interviewsportal-production.up.railway.app`
Interview Excel	Local: `Interview Software.xlsx` Production: `last_uploaded_excel.xlsx` (synced automatically via watcher/upload)
Database	SQL Server UAT or Production Database as configured on Railway
Credentials	Valid Admin credentials (e.g. Username: `Rizviz` , Password: `5121472`)

Intended Audience

This manual is intended for **System Administrators** and **Admin-role users** who require full access to all ERP modules and enterprise-wide data.

2. Login Module

The Login Module is the entry point to Rizviz ERP. It ensures that only authorized users can access the platform by verifying identity through company selection, branch selection, username, and password.

URL: `localhost:3000/login` or `rizviz-interviews-portal.vercel.app/login`

> **Important:** All four fields on the login screen are mandatory. Leaving any field empty will prevent login.

Login Screen Overview

When you navigate to the ERP login URL, the Account Login screen is displayed:

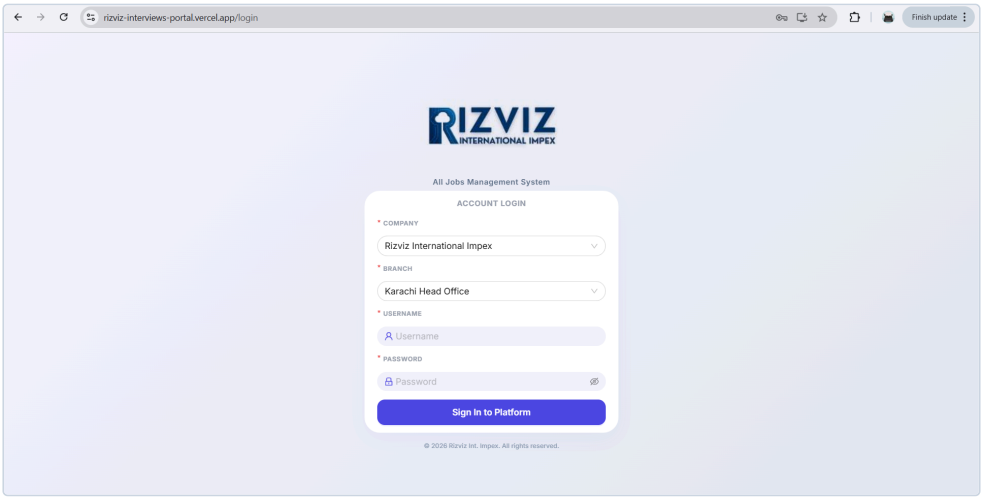

Figure 1 — Rizviz ERP Login Page (Account Login Form)

Below the screenshot, the login page consists of:

- **Header** — "Account Login" title in bold dark blue
- **Company dropdown** — Select legal entity (e.g. Rizviz International Impex)
- **Branch dropdown** — Enabled after company selection (e.g. Lahore Tech Branch)
- **Username field** — Person icon; enter assigned username

- **Password field** — Lock icon; eye icon toggles visibility
- **Sign In to Platform** — Purple submit button
- **Footer** — "© 2026 Rizviz Int. Impex. All rights reserved."

Login Form — Field Reference

Field Name	Status	Description
Company	Required	Legal entity (e.g. Rizviz International Impex)
Branch	Required	Branch office assigned to the user
Username	Required	Assigned ERP login name
Password	Required	Secret password; masked with dots (●) by default

Step-by-Step Login Instructions

1. Open the ERP URL in your browser: `localhost:3000/login` or the production portal URL.
2. Select **Company** — Rizviz International Impex.
3. Select **Branch** — e.g. Lahore Tech Branch.
4. Enter your **Username** and **Password**.
5. Click **Sign In to Platform**.
6. Admin users are redirected to the **Management Dashboard**.

Available Branches

- Karachi Head Office
- Lahore Tech Branch
- Islamabad Executive Branch

> **Note:** Only select the branch to which you are officially assigned.

Password Field — Behavior

The Password field masks characters by default. Click the eye icon to reveal plain text; click again to re-mask.

> **Note:** Security Tip: Do not use show-password in public or shared areas.

Sign In Button — Behavior

- **Success** — Redirect to Management Dashboard (Admin).
- **Empty field** — System highlights missing field.
- **Invalid credentials** — Authentication error displayed.

Login — Troubleshooting

Issue	Resolution
Branch dropdown empty	Select Company first.
Invalid username/password	Verify credentials; check Caps Lock; contact IT.
Page not loading	Clear cache; enable JavaScript; use Chrome.
Forgot password	Contact system administrator — no self-service reset.

2.1 Workspace Initialization

Upon successful login, if the platform does not yet contain active interview data or the system session requires onboarding, the administrator is presented with the **Initialize Workspace** screen. This interface forces data loading and schema checks to prepare the ERP system for use.

URL: `localhost:3000/dashboard` (Uninitialized state) or `rizviz-interviews-portal.vercel.app/dashboard`

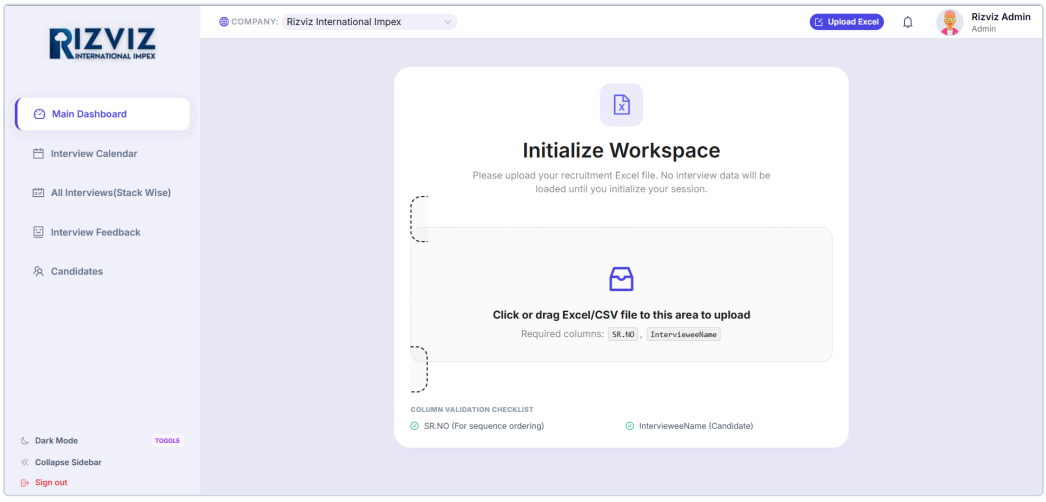

Figure 2 — Initialize Workspace Screen (Pending Excel Upload)

Below the screenshot, the initialization page consists of:

- **Title Notice** — "Initialize Workspace" message informing that no data will be loaded until the spreadsheet is uploaded.

- **File Drag & Drop Box** — Large container where users can click or drag their spreadsheet file to upload.
- **Required Columns Checklist** — Display of mandatory columns (`SR.NO` and `IntervieweeName`).
- **Validation Indicators** — Live green checklist showing sequence and candidate name correctness.
- **Header** — Displays the selected company ("Rizviz International Impex") and active administrator details ("Rizviz Admin").
- **Navigation Sidebar** — Links to Dashboard, Calendar, Interviews, AI Feedback, and Candidates modules.

Column Mapping Requirements

Column	Status	Description / Purpose
SR.NO	Required	For sequence ordering of interview entries
IntervieweeName	Required	Full name of the candidate/interviewee

> **Note:** Make sure to save the spreadsheet as a .xlsx or .csv file and ensure all mandatory columns are filled before uploading.

3. Management Dashboard

Once the workspace is initialized by uploading the recruitment spreadsheet (or when logging in with an already-initialized session), the **Management Dashboard** opens automatically. It provides a real-time consolidated view of recruitment activity, lead generation, and interview pipelines.

URL: `localhost:3000/dashboard` or `rizviz-interviews-portal.vercel.app/dashboard`

Dashboard — Live Recruitment Pipeline Overview

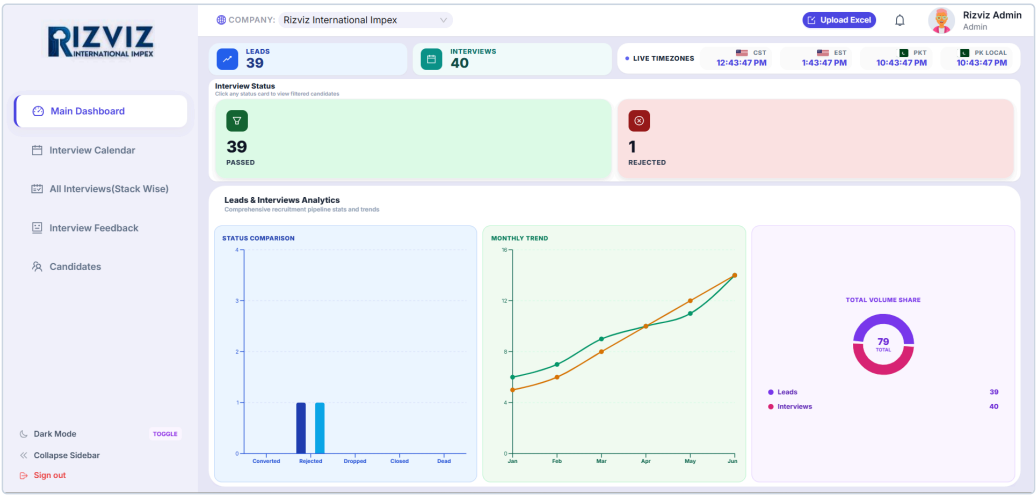

Figure 3 — Management Dashboard — Live Recruitment Pipeline Overview

Below the screenshot, the dashboard provides a high-level summary divided into key sections:

- **Header** — Displays selected company, the "Upload Excel" action button, notification icon, and logged-in administrator details.
- **Top-Level Metrics** — Summary cards for "LEADS" and "INTERVIEWS" showing total counts.
- **Live Timezones** — Real-time clock widgets showing CST, EST, PKT, and Pakistan Local time.
- **Interview Status Cards** — Visual counters for candidates by status, including "PASSED" and "REJECTED". Clicking a card filters the candidate list.

Main Dashboard Metrics

Card / Widget	Value	Description
LEADS	39	Total leads compiled from synchronization
INTERVIEWS	40	Total scheduled/recorded interviews
PASSED	39	Candidates who successfully cleared the interviews
REJECTED	1	Candidates marked as rejected

Leads & Interviews Analytics

The bottom section of the dashboard displays detailed charts and visual trends based on the imported database:

- **Status Comparison** — Bar chart visualizing candidates across different stages (Converted, Rejected, Dropped, Closed, Dead).
- **Monthly Trend** — Line chart tracing Leads (blue/green) and Interviews (orange) volume growth from January through June.
- **Total Volume Share** — Donut chart highlighting the breakdown of the total 79 items (39 Leads and 40 Interviews) to show relative weight.

Dashboard — Dark Mode View

Toggle between Light and Dark mode using the sidebar switch. Dark mode styles the entire interface with a sleek, dark color scheme to optimize visibility in low-light environments while preserving chart clarity.

> **Note:** Administrators can click any status card or chart data point to deep-dive into the filtered lists of candidates and interviews.

3.1 Interview Calendar Module

The Interview Calendar plots all interview events on a month-by-month grid, allowing administrators to visually track scheduled, completed, and upcoming interviews.

URL: `localhost:3000/interviews/calendar` or `rizviz-interviews-portal.vercel.app/interviews/calendar`

Calendar View — Full Month Grid (Top Section)

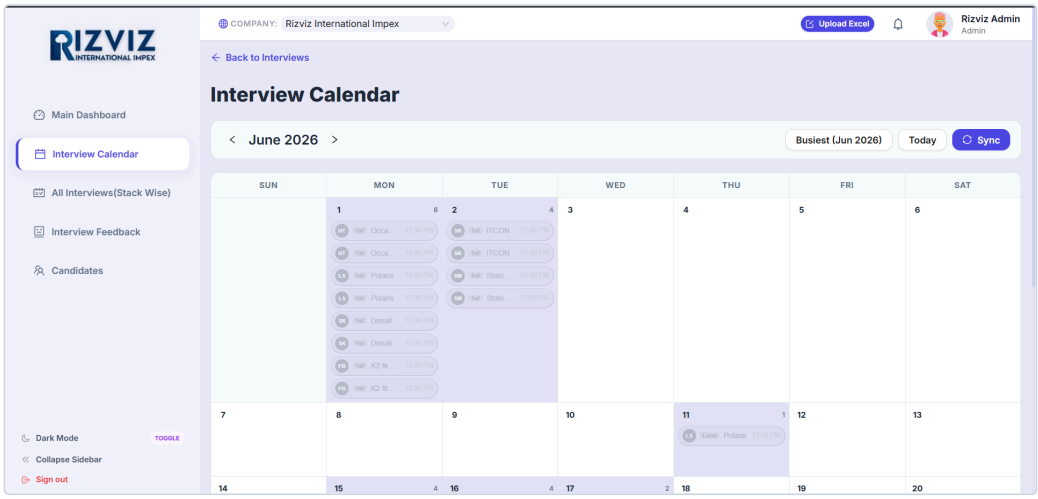

Figure 4 — Interview Calendar — June 2026 Full Month Grid (Top)

The main calendar view shows the full month of **June 2026** in a standard week grid (SUN–SAT). Key elements include:

- **Back to Interviews** — Link at top to return to the Interviews table.
- **Month Navigation** — « June 2026 » arrows to move between months.
- **Busiest (Jun 2026)** — Button that highlights the month with the highest interview volume.
- **Today** — Button to jump to the current date (highlighted with a blue circle, e.g. 23rd).
- **Sync** — Button to refresh calendar data from the database.
- **Event Chips** — Each chip shows the candidate initials, company name, and time (e.g. *HT · 1st · Occa... · 12:00 PM*).

Calendar Color Coding — Gray vs Colored Events

Event Chip Color	Status	Meaning
Gray (Disabled / Muted)	Done / Happened	Interviews that have already been conducted or completed appear in gray, indicating they are past events.
Colored (Purple / Blue / Green / Orange)	Upcoming / Scheduled	Interviews that are scheduled and will happen in the future appear in their respective status colors.

Note: Gray chips = past interviews (already happened). Colored chips = future interviews (will happen). Use this to quickly distinguish upcoming work from completed interviews.

Calendar View — Bottom Section & No Date on File

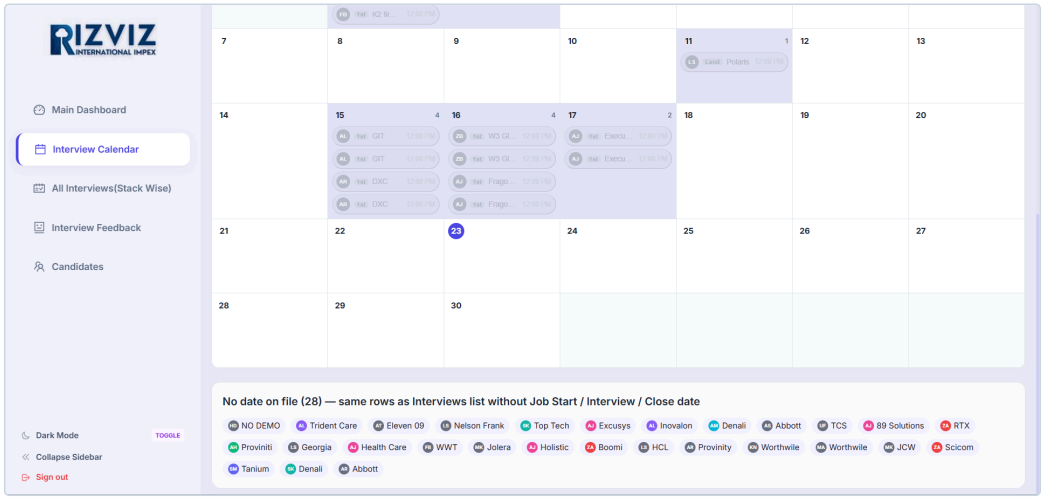

Figure 5 — Interview Calendar — Bottom Grid and Unscheduled Interviews

The bottom portion of the calendar continues the monthly grid and includes a special **"No date on file"** section:

- **Continued Grid** — Weeks 2–5 of June showing events on dates 7–30.
- **Colored event on Thu 11** — A green-colored chip (*LS · Land · Polaris · 12:00 PM*) indicates an upcoming scheduled interview.
- **Gray events on Mon 15, Tue 16, Wed 17** — Muted chips for companies like GIT, DXC, W3 Gl..., Execu..., Frago... indicate completed/past interviews.
- **No date on file (28)** — A footer section listing 28 interview records that have no Job Start / Interview / Close date assigned.
- **Company Badges** — Color-coded company initials (e.g. *NO DEMO, Trident Care, Eleven 09, Nelson Frank, Top Tech, Excusys, Inovalon, Denali, Abbott, TCS, 89 Solutions, RTX*, etc.) showing which candidates lack scheduling data.

Note: Interviews listed under 'No date on file' need a Job Start Date, Interview Date, or Close Date to appear on the calendar grid. Update these in the Excel sheet or via the edit modal.

Calendar View — Event Detail Tooltip (Hover)

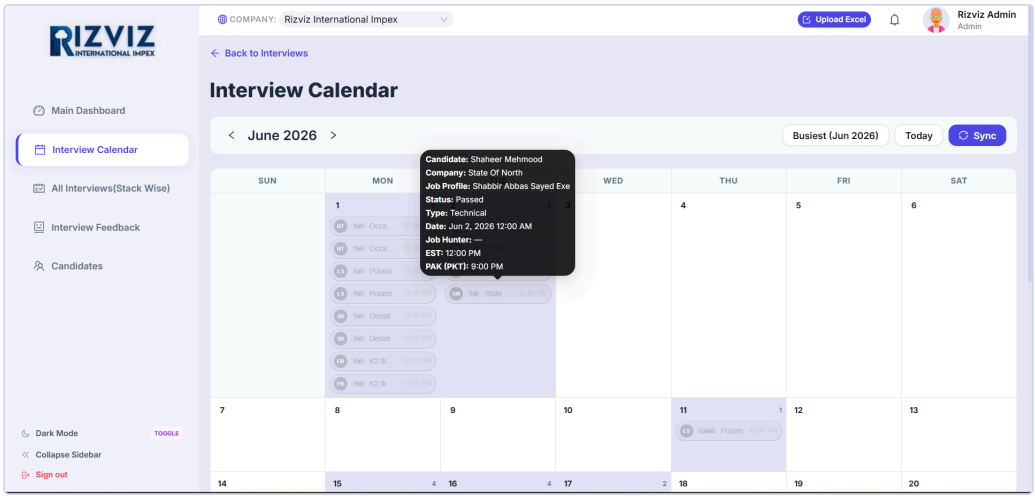

Figure 6 — Interview Calendar — Candidate Detail Tooltip on Hover

Hovering over any event chip on the calendar reveals a detailed tooltip with the full interview record:

Field	Example Value
Candidate	Shaheer Mehmood
Company	State Of North
Job Profile	Shabbir Abbas Sayed Exe
Status	Passed
Type	Technical
Date	Jun 2, 2026 12:00 AM
Job Hunter	—
EST	12:00 PM
PAK (PKT)	9:00 PM

The tooltip provides instant access to candidate details without leaving the calendar view. It displays the candidate name, company, job profile, interview status, type, date, and timezone conversions (EST and PKT).

> **Note:** Click on an event chip to open the full interview record for editing or status updates.

4. All Interviews (Stack Wise)

The Interviews Module displays all interview records synced from the uploaded Excel spreadsheet. Administrators can search, filter, edit, delete, and export interview data. The module is labeled **"All Interviews (Stack Wise)"** in the sidebar navigation.

URL: `localhost:3000/interviews` or `rizviz-interviews-portal.vercel.app/interviews`

Interviews — KPI Cards, Filters, and Table Header

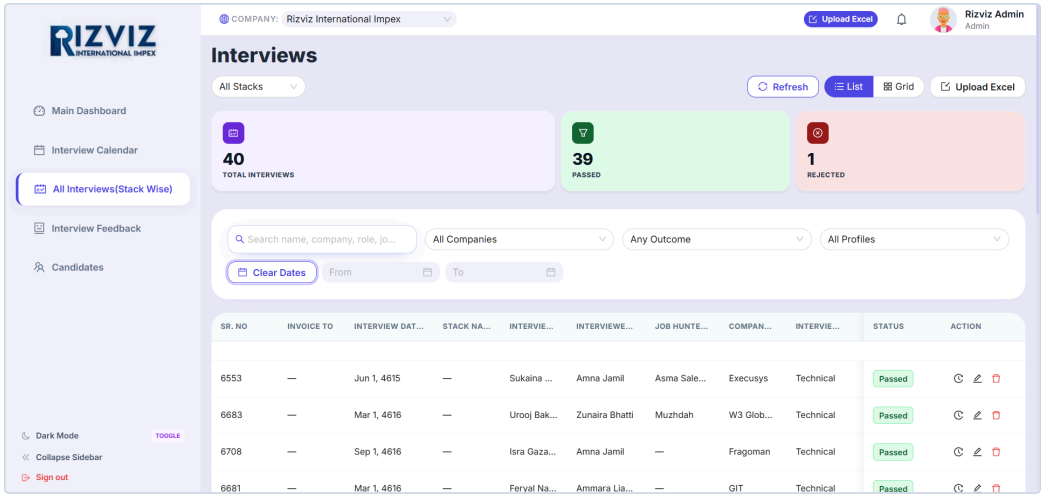

Figure 7 — All Interviews — KPI Cards, Search Filters, and Table (Top)

The top section of the Interviews page provides a high-level summary and filtering capabilities:

- **Stack Selector** — Dropdown labeled "All Stacks" to filter by interview stack/category.
- **View Toggle** — Switch between **Refresh**, **List** (default), **Grid**, and **Upload Excel** views.
- **KPI Summary Cards**:

Card	Value	Color	Description
TOTAL INTERVIEWS	40	Blue	Total interview records loaded from the Excel file
PASSED	39	Green	Candidates who successfully cleared the interview
REJECTED	1	Red/Pink	Candidates marked as rejected

Search & Filter Bar

Filter	Description
Search	Free-text search by name, company, role, or job profile
All Companies	Dropdown to filter by specific company (e.g. Excusys, W3 Global, Fragoman, GIT, DXC, etc.)
Any Outcome	Filter by interview outcome status (Passed, Rejected)
All Profiles	Filter by interview type/profile (Technical, HR, Combined)
Date Range (From / To)	Filter interviews by date range with calendar date pickers
Clear Dates	Button to reset the date range filter

Interview Table — Column Headers

Column	Description
SR. NO	Unique serial number from the Excel sheet — primary sync match key
INVOICE TO	Entity or client interviewed for
INTERVIEW DATE	Scheduled or actual interview date
STACK NAME	Technical stack or category name
INTERVIEWER	Name of the person conducting the interview
INTERVIEWEE	Name of the candidate being interviewed
JOB HUNTER	Recruiter or job hunter who sourced the candidate
COMPANY	Target client/company name (e.g. Excusys, W3 Global, Fragoman, GIT)
INTERVIEW TYPE	Type of interview: Technical, HR, Combined, etc.
STATUS	Color-coded badge: **Passed** (green) or **Rejected** (red)
ACTION	Row actions: History (clock icon), Edit (pencil icon), Delete (trash icon)

Interviews Table — Data Rows (Middle Section)

Figure 8 — All Interviews — Table Data Rows with Status Badges

The table lists all interview records with the following sample data visible:

SR. NO	Interviewer	Interviewee	Company	Status
6553	Sukaina...	Amna Jamil	Excusys	Passed
6683	Urooj Bak...	Zunaira Bhatti	W3 Global	Passed
6708	Isra Gaza...	Amna Jamil	Fragoman	Passed
6681	Feryal Na...	Ammara Lia...	GIT	Passed
6726	Syed Hus...	Abdul Razzaq	DXC	Passed
6725	Shabbir...	Shaheer Me...	State Of...	Passed
6499	Syeda Fa...	Sadaf Khurr...	ITCON	Passed
6365	Sarmad S...	Hashir Tariq	Occam's...	Passed
6380	Anna Zaidi	Laiba Saeed	Polaris	Passed
6497	Noor Jafr...	Sadaf Khurr...	Denali	Passed
6500	Syed A. R...	Fawaz Baig	K2 firm/E...	Passed

Row Action Icons

Icon	Function
Clock (History)	View the full change log for this interview record — shows all sync history, reschedules, cancellations, and data changes
Pencil (Edit)	Open the edit modal to modify interview details such as date, status, interviewer, company, and notes
Trash (Delete)	Delete the interview record permanently (requires confirmation)

Note: Each row displays a color-coded status badge. Green = Passed, Red = Rejected. All interview types shown are 'Technical' in this dataset.

Interviews Table — Bottom Section & Pagination

Figure 9 — All Interviews — Bottom Rows, Rejected Status, and Pagination

The bottom section of the interviews table continues displaying records and includes the pagination controls:

- **Continued Rows** — Rows from SR 6380 through SR 6354, showing candidates from companies like Polaris, Denali, K2 firm, SAP, NO DEMO, Trident C..., Eleven 09, Nelson Fr..., Top Tech, Excusys, Inovalon, and Denali.
- **Rejected Row (Highlighted)** — SR 6035 for candidate Hammad Kh... at company **NO DEMO** shows a red **Rejected** badge, visually distinguished from the green Passed badges.
- **Horizontal Scrollbar** — Appears at the bottom to scroll through all table columns when the viewport is narrow.

Pagination Controls

Element	Description
Row Count	Displays "1-20 of 40 rows" showing the current page range and total record count
Page Navigation	Previous (<) and Next (>) arrows to navigate between pages
Page Numbers	Clickable page indicators (1, 2) for direct page access
Rows Per Page	Dropdown to change display density: 20 / page (default), configurable to 10, 50, or 100

Note: The pagination shows 40 total rows across 2 pages. Adjust the rows per page selector to view more records at once.

5. Excel Sync — Interview Data Synchronization

All interview data in the system is sourced from an Excel spreadsheet. The platform supports two methods for syncing data: **Manual Upload** (via the Upload Excel button) and **Automatic Watcher** (file system monitoring in local development).

Upload Excel — How It Works

1. Click the **Upload Excel** button (green button in the header bar or the toolbar).
2. Select or drag your Excel file (`.xlsx` or `.csv`) into the upload area.
3. The system validates the file for required columns: `SR.NO` and `IntervieweeName` .
4. If validation passes, the data is parsed and compared with the existing database records.
5. A **Sync Summary** modal appears showing: new rows added, changed rows updated, unchanged rows, and any failed rows.
6. The interview table automatically refreshes with the latest data.

Refresh — Local File Sync

1. Open **Interview Software.xlsx** on your local machine.
2. Make changes — edit dates, names, statuses, or add new rows.
3. Save the file with **Ctrl+S**.
4. In the Interviews module, click the **Refresh** button.
5. The system reads the updated Excel file, compares it with the database, and syncs changes.
6. Review the sync summary modal for details on what changed.

Important: Rows are matched by the **SR.NO** column. Do not change the SR number of existing records unless you intend to create a new entry. Changing SR numbers will cause duplicate records.

Sync Summary — What Gets Compared

Field	Description
New Rows	Records in Excel that don't exist in the database (matched by SR.NO)
Changed Rows	Records where one or more fields differ between Excel and database
Unchanged Rows	Records that are identical in both Excel and database
Failed Rows	Records that couldn't be synced due to validation errors or missing data
Deleted Rows	Records present in database but missing from the Excel file

Excel File Requirements

Requirement	Details
File Format	`.xlsx` (recommended) or `.csv`
Required Columns	`SR.NO` (sequence ordering) and `IntervieweeName` (candidate name)
Column Mapping	The system auto-maps columns by header name. Additional columns (Invoice To, Interview Date, Company, Status, etc.) are mapped automatically if present.
Max File Size	Up to 10 MB recommended for optimal performance

> **Note:** After every sync, the system stores the uploaded file as `last_uploaded_excel.xlsx` on the server. This ensures continuity even if the original file is moved or renamed.

6. AI Feedback Module

The AI Feedback Module captures, transcribes, and enhances candidate interview feedback using voice-to-text and AI text processing. It enables recruiters to input voice feedback (supporting bilingual Urdu/English speech), transcribe it automatically, and sync it immediately to the database and a Google Spreadsheet ledger.

URL: `localhost:3000/interviews/feedback` or `rizviz-interviews-portal.vercel.app/interviews/feedback`

Interview Feedback — Data Table

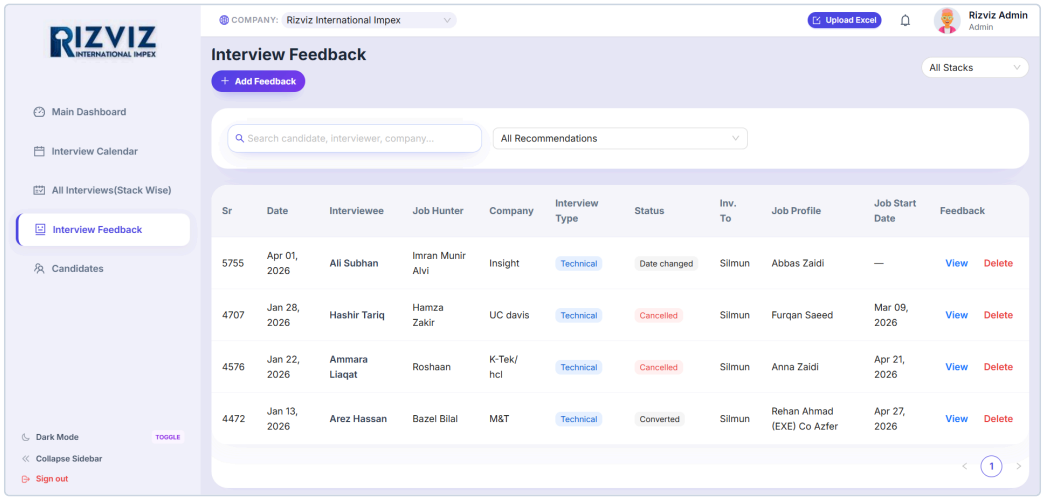

Figure 10 — Interview Feedback — Dashboard Data Table

The Interview Feedback dashboard displays all logged feedback entries synced from the Google Sheets ledger:

- **Add Feedback Button** — Purple button labeled **"+ Add Feedback"** opens the AI Feedback entry form modal.
- **Filters & Search** — Filters by Interview Stack, Search input (candidate, interviewer, company), and Recommendations dropdown.
- **Feedback Table** — Displays key fields for each feedback entry: Sr, Date, Interviewee, Job Hunter, Company, Interview Type, Status, Invoice To, Job Profile, Job Start Date, and Actions.

Status Badge Color Logic

Status	Badge Color	Meaning
Converted	Green	The candidate successfully cleared all rounds and was hired
Date changed	Grey / Muted	The interview was rescheduled to a different date
Cancelled	Red	The scheduled interview was cancelled
Rejected	Red	The candidate did not pass the interview round
Postponed / Dropped	Orange	The interview was deferred or candidate was dropped from the process

Row Action Buttons

Button	Action / Function
View (Blue link)	Opens a read-only details modal containing the transcribed text, strengths, weaknesses, and ratings
Delete (Red link)	Permanently deletes the feedback entry from both the database and the synced Google Spreadsheet

Add Feedback Modal — Voice Input & Interview Selector

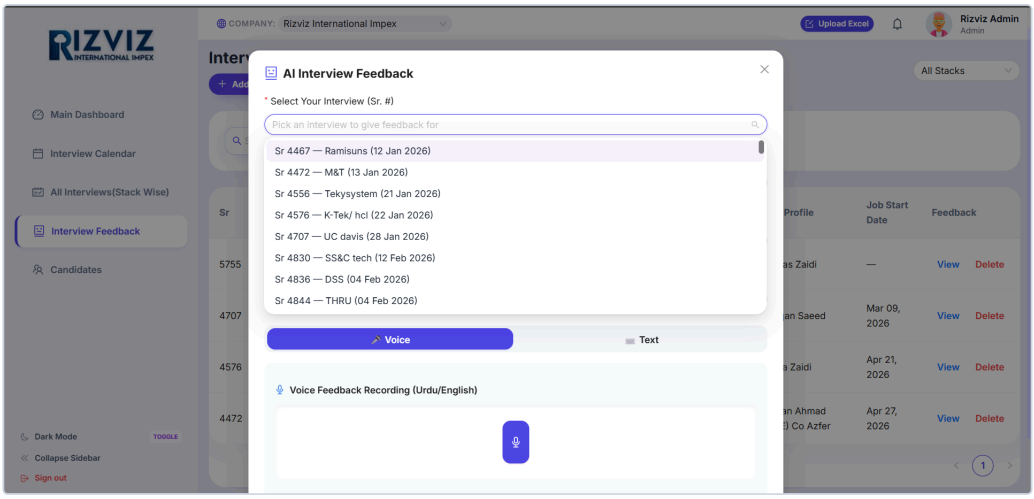

Figure 11 — Add Feedback Modal — Interview Selector and Voice Recording Mode

Clicking **"+ Add Feedback"** opens a modal overlay allowing recruiters to record or type feedback:

- **Select Your Interview (Sr. #)** — Dropdown containing pending interviews loaded from the main database (e.g. *Sr 4467 — Ramisuns, Sr 4472 — M&T, Sr 4556 — Tekysystem*, etc.).
- **Voice / Text Tabs** — Toggle input modes. **Voice** allows direct voice recording; **Text** allows typing notes.
- **Voice Recording Button** — A large blue microphone button to start and stop audio recording. It supports bilingual Urdu and English speech.

Add Feedback Modal — Automated Information Autofill

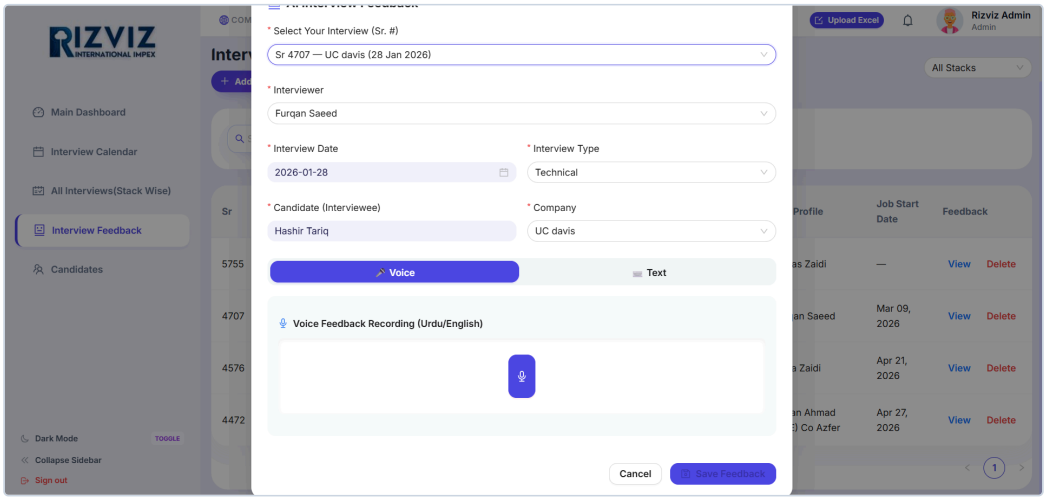

Figure 12 — Add Feedback Modal — Automated Data Autofill on Selection

Selecting an interview Sr. # automatically fills in all related record fields to ensure data accuracy and speed up processing:

Autofilled Field	Source / Description
Interviewer	Auto-populated name of the interviewer (e.g., Furqan Saeed)
Interview Date	Auto-populated date of the interview (e.g., 2026-01-28)
Interview Type	Auto-populated interview type (e.g., Technical, HR, Combined)
Candidate (Interviewee)	Auto-populated candidate name (e.g., Hashir Tariq)
Company	Auto-populated target client company (e.g., UC davis)

Submitting Feedback

1. Select the interview Sr. # from the dropdown list.
2. Record audio using the Voice tab (or type notes in the Text tab).
3. Review autofilled candidate and interviewer details.
4. Click **Save Feedback** to finalize.
5. The system processes audio using AI, saves the record, and triggers synchronization.

> **Note:** Duplicate prevention: The system automatically hides already-logged interview Sr. #s from the dropdown to prevent duplicate feedback entries.

6.1 Google Sheets Synchronization

The system integrates directly with a live Google Spreadsheet to maintain a collaborative and real-time backup ledger of all interview feedback. This allows team members without direct ERP access to view and analyze recruitment metrics in Google Workspace.

Google Sheets Synchronization Ledger

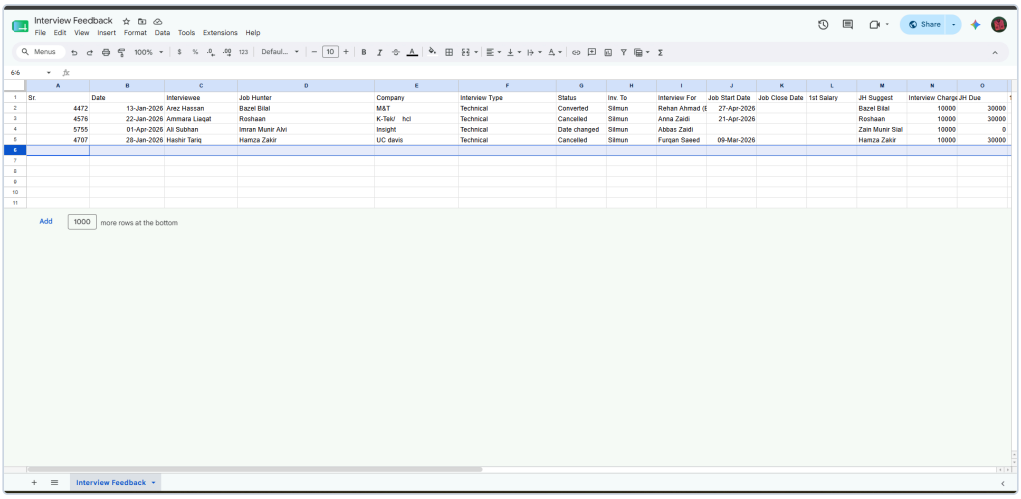

Figure 13 — Interview Feedback Google Sheets Sync Ledger

The Google Sheet matches the ERP database columns precisely and is updated automatically:

- **Real-time Sync Triggers** — Adding or deleting a feedback record in the ERP immediately sends an API request to update the Google Sheet.
- **Bidirectional Consistency** — The row structure in the sheet aligns perfectly with the ERP table, showcasing columns for candidate profile, job hunter, client, status, job dates, and salary figures.
- **Collaborative Sharing** — The sheet can be shared securely with senior stakeholders who need real-time summaries of candidate evaluations.

Google Sheets Ledger Columns

Column Name	ERP Mapping	Description
Sr.	SR. NO	Match key sequence number from Excel sheet
Date	INTERVIEW DATE	Interview schedule date
Interviewee	CANDIDATE NAME	Candidate name
Job Hunter / Company	RECRUITER / CLIENT	Source recruiter and client company details
Status	OUTCOME STATUS	Synced outcome (Converted, Cancelled, Date changed, etc.)
Job Start Date	START DATE	Scheduled starting date of candidate
JH Suggest / Due	RECRUITER DETAILS	Recruitment fee and candidate status tracking details

> **Note:** Do not delete columns or rename headers in the Google Sheet. This will break the synchronization pipeline between the ERP and Google Workspace.

6.2 Candidates Directory Module

The Candidates Directory Module provides an aggregated, candidate-centric view of all recruitment activities. Instead of browsing individual interviews, administrators can search for a specific candidate to see their entire history, including their total count of interviews, leads, companies applied to, and detailed outcome status.

URL: `localhost:3000/candidates` or `rizviz-interviews-portal.vercel.app/candidates`

Candidates Directory Grid View

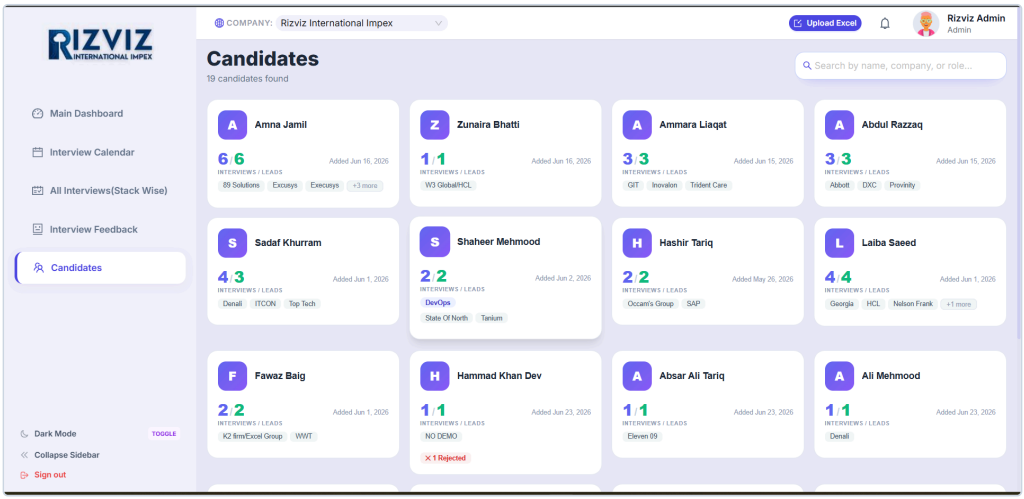

Figure 14 — Candidates Directory Grid View

The main screen lists all candidates in a responsive card grid layout:

- **Total Count** — Labeled e.g. "19 candidates found" to show the size of the talent pool.
- **Search Bar** — Labeled "Search by name, company, or role..." for immediate real-time filtering.
- **Candidate Cards** — Individual summary cards showing the candidate's initials, name, ratio of interviews/leads, date added, and company tags.
- **Outcome Flags** — Rejections are flagged directly on the cards (e.g. "x 1 Rejected" on Hammad Khan Dev's card).

Candidate Card Components

Component	Description
Initials Badge	Large circular badge (e.g. 'A' for Amna Jamil, 'Z' for Zunaira Bhatti) in category-specific colors.
Interviews / Leads Ratio	Shows active participation (e.g., '6/6' indicating 6 interviews conducted for 6 matching leads).
Company Badges	Horizontal tags showing all clients the candidate has interacted with (e.g., Excusys, HCL, Trident Care).
Added Date	Timestamp displaying when the candidate was first introduced to the system (e.g., 'Added Jun 15, 2026').

Candidate Profile Drawer

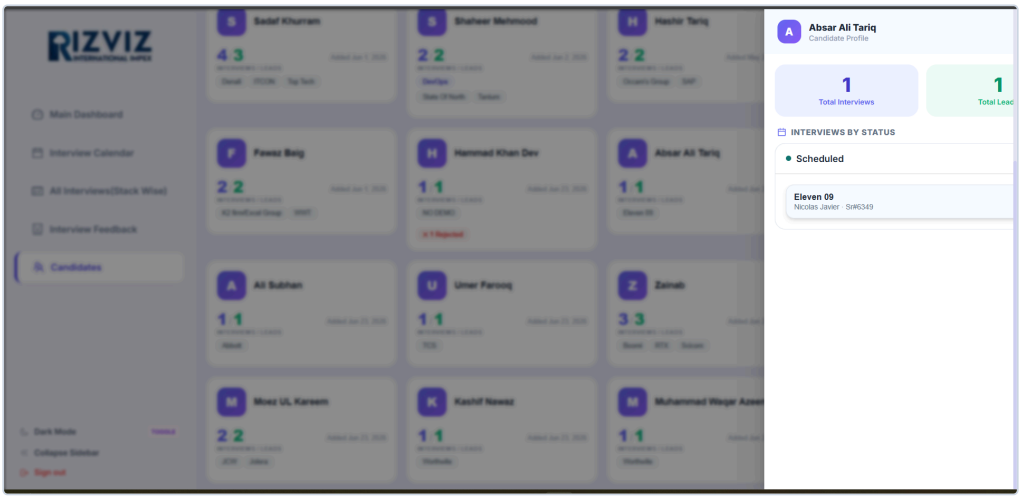

Figure 15 — Candidate Profile Drawer (Slide-out Panel)

Clicking on any candidate card slides out the Candidate Profile Drawer from the right side of the screen:

- **Aggregated Statistics** — Top cards displaying "Total Interviews" and "Total Leads" for the selected candidate.
- **Interviews by Status** — Chronological breakdown of interviews, grouped by their status (e.g. Scheduled, Completed, Rejected).
- **Interactive Entries** — Clicking any individual interview item in the list slides out a secondary details panel.

Interview Details & Feedback Drawer

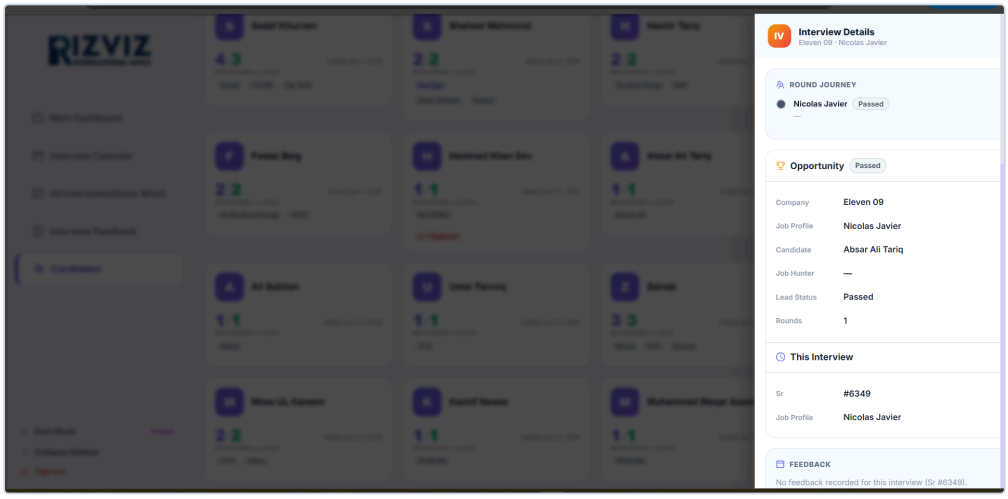

Figure 16 — Nested Interview Details & Feedback Drawer

The nested drawer displays the complete metadata of the selected interview session:

Section	Details Provided
Round Journey	Step-by-step progress tracking with candidate status (e.g., Nicolas Javier - Passed).
Opportunity Info	Comprehensive record details: Company name, Job Profile, Candidate Name, Sourcing Job Hunter, Lead Status, and number of rounds.
This Interview	Unique Sr # matching key and Job Profile name.
Feedback Panel	Shows the AI-enhanced feedback, transcription text, candidate strengths, weaknesses, and ratings (or 'No feedback recorded' if empty).

Note: Use the Candidates Directory to get a unified timeline of a candidate's journey when they undergo multiple interview rounds with different clients.
